

STRAND ELECTRONICS

Committed to quality as a basic business principle.
Quality means providing our customers with products
and services that satisfy their expectations.

— Giorgio Sammut General Manager

Corporate Profile

Strand Electronics Limited is a limited liability company, which was established in 1987 as a member of M.C. Holdings. It is an affiliate of Alf. Mizzi Group of Companies, one of Malta's largest organizations.

Strand Electronics Ltd. is...

"Committed to quality as a basic business principle. Quality means providing our customers with products and services that satisfy their expectations."

The company's business activities span across four different divisions.

We are the local distributors of Kyocera products and the authorized after-sales providers with over 30 years of experience and knowledge. We offer end-to-end solutions, from multifunction devices and printers to software solutions which include Secure Printing and Print Control and also OCR solution which can all be customized to individual client requirements.

The company also prides itself with the Professional Equipment Division, which includes the supply,

installation and maintenance of Intruder Alarms, Fire Alarms & Fire doors, CCTV Systems, Telephone Systems, Nurse Call Systems, PA & Evacuation Systems, Hall Porters, Access Control & Automated Entry Solutions, Data Infrastructure & Cable Management and Hotel Locking systems.

We also strongly believe in the benefits and advantages of renewable energy and have been a significant player in the PV solar panel market for over 12 years.

The company has also ventured into the LED Billboards & LCD Display market, offering a vast range of both outdoor and indoor displays.

With a client base in excess of 2,000 Strand Electronics Ltd. prides itself on an on-going commitment to quality and providing expert service and support to their customers.

- Return of Investment (ROI)

KYOCERA FLEET SERVICES

Maximise visibility, optimise profitability

KYOCERA Fleet Services maximise your print fleet's potential without the need for costly onsite visits. With improved visibility comes less downtime and a better customer experience. Also, with Kyocera devices, remote management is possible.

MY Q

Maximise security & productivity and reduce waste

Kyocera's server-based application, with the embedded Print&Follow™ function is designed to protect your confidential data, manage the overall document output and related printing costs

USB CARD READERS

Tighten printing security

Kyocera's USB Card Readers enable organisations to tighten security and avoid leaks of crucial and confidential information which can make all the difference to the functioning of a business

SCANNER VISION

Creating workflows easily

ScannerVision automates document workflows by capturing, processing and storing scanned documents and documents generated by other applications. ScannerVision offers advanced features to help users create workflows with minimal time and effort.

KYOCERA NET MANAGMENT

Secure and efficient printing

Kyocera's server-based application, with the embedded Print&Follow™ function is designed to protect confidential data, manage the overall document output and related printing costs.

KYOCERA

In today's fast paced business world, office solutions need to be efficient, reliable and virtually problem free, printing solutions are no exception. Strand Electronics together with Kyocera are able to offer printers & multifunctional products that guarantee security, efficiency, cost effectiveness and safeguard the environment.

Kyocera machines provide high quality printing in vibrant colour with a flexible approach to paper-handling and finishing, it is the complete solution to all of your office document requirements.

What's more, security is guaranteed through the use of the latest technology to protect your most valuable data.

Kyocera machines offer numerous features such as;

- Touch-screen panel
- Wireless connectivity
- Flexible paper-handling from A6 up to SRA3 for up to 7,150 sheets
- Individual paper handling options, including booklet and tri-folding
- Human detection sensor
- Individual paper handling options, including booklet and tri-folding
- Comprehensive support for all state-of-the-art mobile communications
- Long-life components providing exceptional efficiency and reliability, and less waste

Kyocera is the ideal solution.

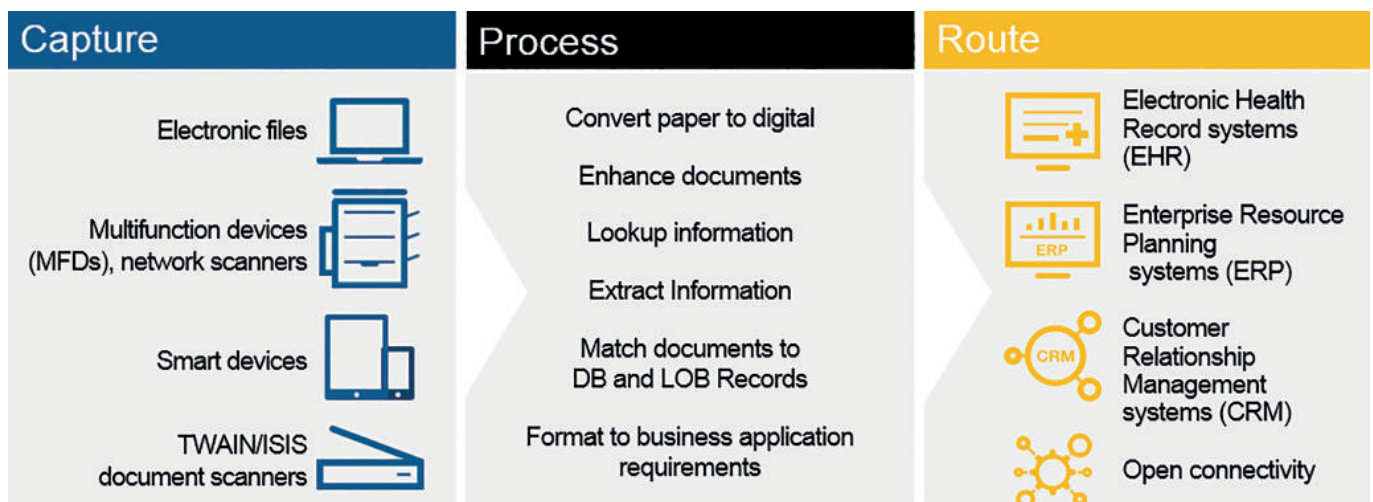

Kofax AutoStore

Kofax AutoStore® is a server-based application which orchestrates the capture and secure delivery of paper and electronic documents into business applications. It is well suited for organizations of all sizes who need fast, rules driven and repeated scanning of the same type document so information is available in a business system for further analysis. (ERP, CRM, EHR).

Whether you're handling invoices, claims, applications or order forms, AutoStore can automate your document-driven business processes to help lower costs, improve operational efficiency, and increase document security to reduce risk of non-compliance. Documents are accurately processed and electronic information is available to the right people for analysis.

Kofax AutoStore®

PaperCut

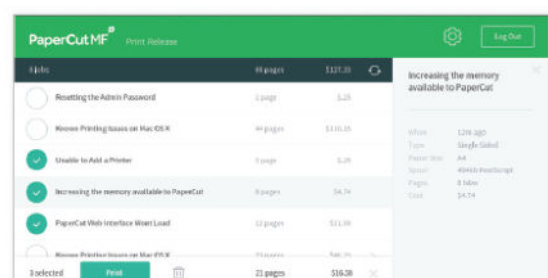

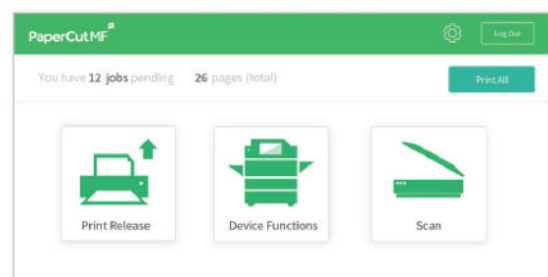

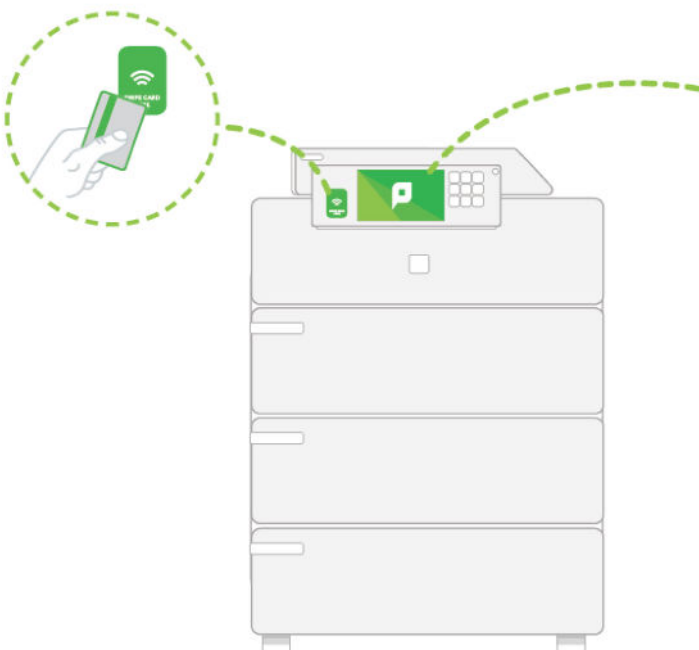

Eliminate waste, encourage responsible behaviour and make users and departments accountable for their print usage.

PaperCut MF includes embedded software that runs on your copier/ MFD to enable tracking, control and secure print release directly from the device's panel.

PaperCut^{MF}

Secure Printing

CCTV

Observation and video monitoring systems have nowadays become a must for most businesses. Strand Electronics prides itself in the supply, installation and design of both Analogue and IP based CCTV systems for a wide spectrum of applications tailor made for client's requirements and specifications.

We offer services ranging from basic observation systems and household applications to the more complex systems, where security is paramount for the running of day to day businesses and safety of employees at their workplace.

Fire Detection

Strand Electronics offers a vast range of Fire detection Systems. We supply, install and design fire detection systems which can be tailor made for client's requirements and specifications.

Our range of systems varies from a small conventional system to large and high-end systems using advanced addressable technology.

We offer a wide range of detectors and peripherals which can be installed in any kind of building, such as, smoke detectors, heat detectors, manual call points, heat Linear, beams and many more depending on what is required by the client.

All our proposed systems are all certified to EN54-2/4 standards.

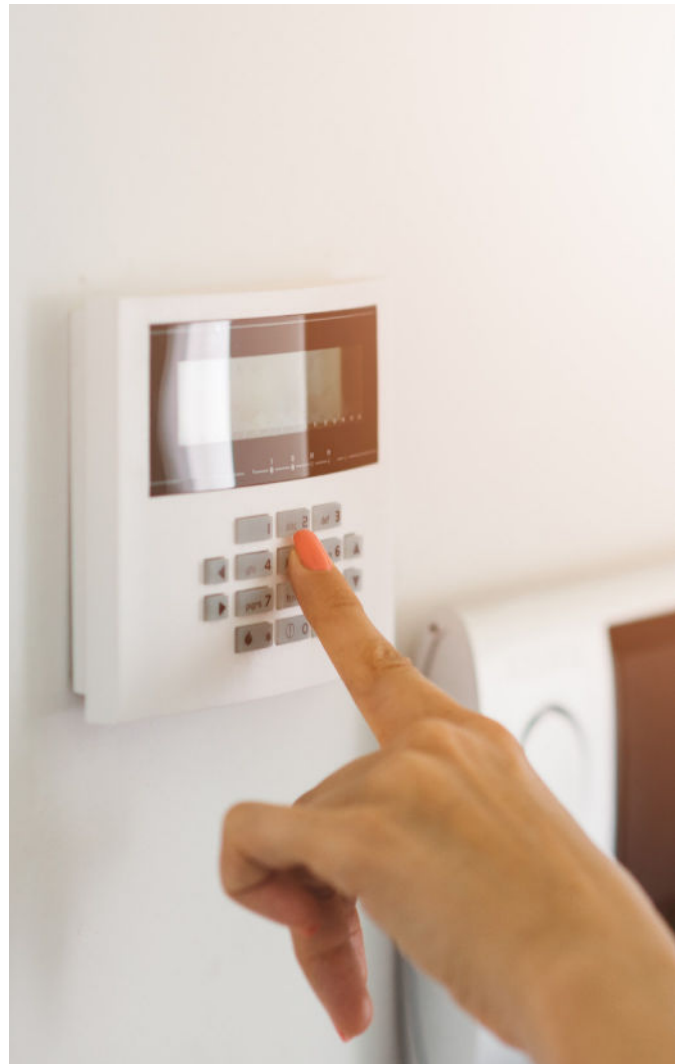

Intruder Alarms

Whether it is for residential, small commercial premises or large premises, Strand Electronics are proud to offer intruder alarm systems with the latest technology.

We offer a vast range of intruder alarm systems, from fully wired, to fully wireless or even a hybrid solution, whereby we offer a vast range of detection devices such as motion detectors, glass break detectors, door contacts and many others.

Given today's very hectic lifestyle, being able to access and monitor your alarm from anywhere in the world is key. With today's technology our intruder alarm system can be fully controlled through an application on your smartphone, so whether it is to arm, disarm the system, receive notifications or even just to simply view the status of your system, this can all be done through the application.

Barriers & Gates

We offer solutions for all domestic and commercial requirements. Our vast range of solutions and use of high quality materials including stainless steel and aluminium, bring real value to a product offering which is truly unique and which delivers solutions for all gate types and barriers whatever the size, length or style.

RFID Systems

Radio Frequency Identification (RFID) is the wireless non-contact use of radio frequency waves to transfer data. Tagging items with RFID tags allows users to automatically and uniquely identify and track inventory and assets. RFID takes auto-ID technology to the next level by allowing tags to be read without line of sight and, depending on the type of RFID, having a read range between a few centimeters to over 20+ meters.

We offer tailor made and customizable solutions, whether it's a small business or a large commercial project.

Telephone System/Pabx

Nowadays communication is essential, whether it is a small domestic property to a business environment, our systems can be designed and installed according to the client needs.

We have a comprehensive range of Pabx Systems & PBX Systems that vary from analogue to IP Based and to the more modernized system using SIP protocol telephone systems which can also be integrated with other systems such as video door entries and much more.

Hall Porters

An intercom system can significantly increase your level of security by serving as an added form of surveillance.

We offer a vast range of intercom systems, ranging from residential to large commercial premises. basic systems to IP systems which can also be integrated with other security systems, such as; Access Control and Gates & Barriers.

With today's technology, the intercom system can be easily accessed from your smartphone through an application which allows you to fully communicate from anywhere around the world.

Hotel Locking

Optimised, bespoke solutions for your guests and easy to use systems for your staff. Hotek are pioneers in the development of security, access-control solutions for the entire hospitality industry spectrum.

Discover Hotek's online and offline systems, created with intelligent technology, digital solutions. This is the lock of the future, designed with thought for each varying situation and establishment.

Hotek's solutions are tailored to clients' requests, combining locks, system solutions and software to provide efficient and secure access control for both guests and housekeeping.

Time and Attendance and Access Control

Access control systems perform identification authentication and authorization of users and entities by evaluating required login credentials that can include passwords, personal identification numbers (PINs), biometric scans, security tokens and more.

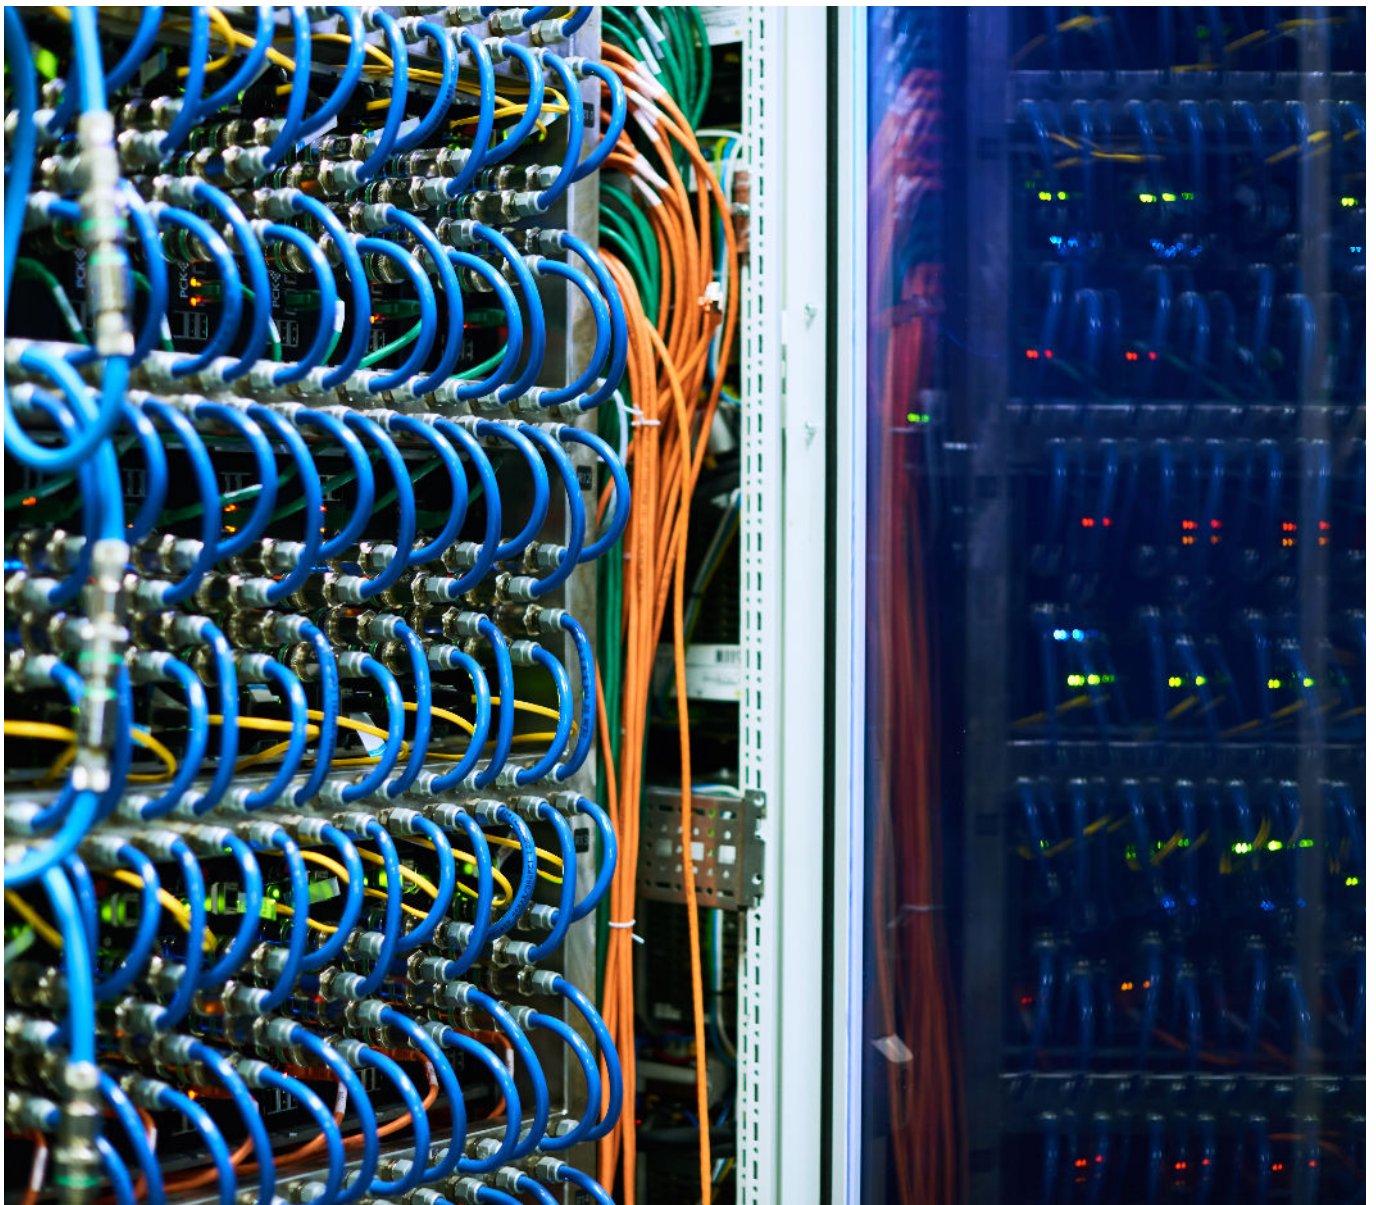

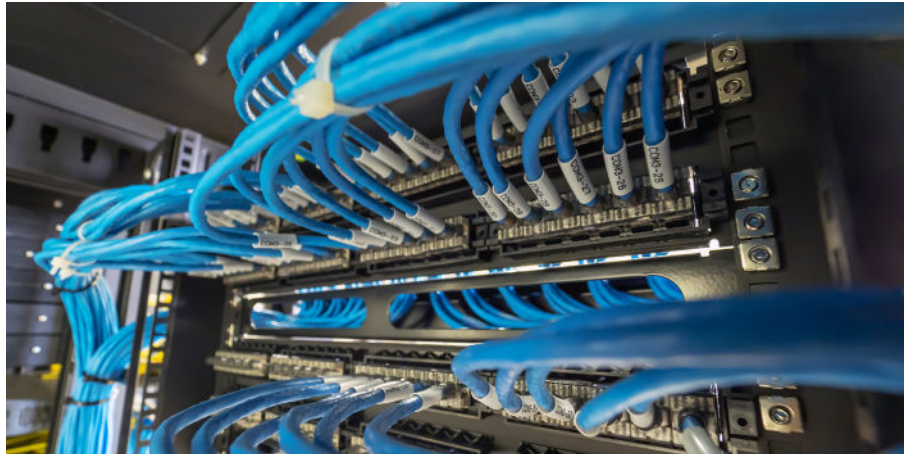

We design, supply and install a full range of solutions for building management, time management and access control.

Data

Nowadays, Networking is becoming absolutely necessary, being residential, small commercial premises or large premises, Strand Electronics can cater for such data infrastructure with the required Certification.

We offer the full solution, from the design of the network, supplying of equipment, full installation and project management.

Our Range of High Security Safes.

We supply and install all grades and sizes of safes. Engineered, built and finished to world class standards with the latest materials and technology.

Tested, certified and approved by independent testing houses to meet insurance standards.

Delivered and installed by our trained technicians, all trained at our Insafe Academy.

Nurse Call Stations

In care applications, staff need to be able to promptly respond to residents calls and efficiency is paramount.

We offer a system that can be tailored to suit a care facility's specific requirements, with different day, night and call divert arrangements, which are easily accommodated to meet the exact operational needs and precise layout of any building.

This solution offers flexibility, coupled with many advanced features such as; multiple call levels and full monitoring of all network devices.

PV Panels

ECO Solutions Ltd (a sister company of Strand Electronics) was established in 2009 to help reduce carbon emissions, produce electricity by using renewable sources and increase efficiency of current applications.

Using the most affordable and top quality products, ECO Solutions is geared up to provide commercial and technical support, installation, maintenance services and information to those interested in renewable energy.

ECO Solutions has supplied systems and consultations for end-user customers all over the island.

Our installed solutions range from a single panel system for an off-grid garden shed to the systems that are composed of hundreds of panels for commercial installations.

ECO Solutions is an REWS and Enemalta registered supplier.

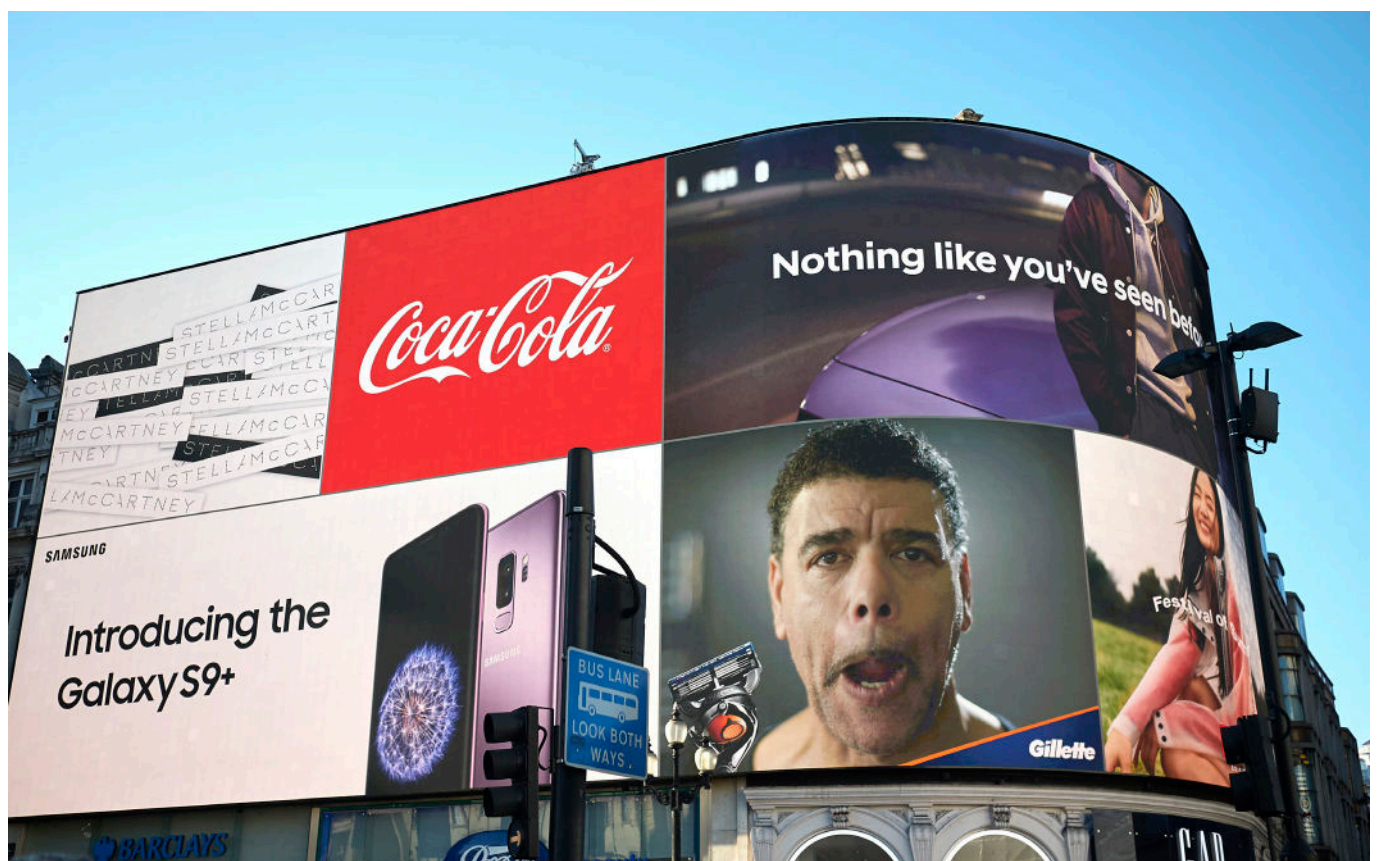

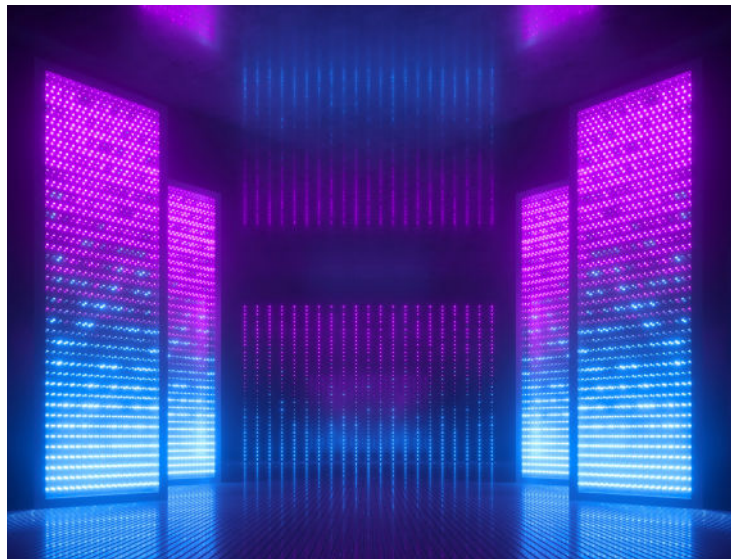

LED & LCD Displays

Strand Electronics has ventured in to the LED billboards & LCD Displays market for both indoor and outdoor advertising.

We offer sizes ranging from 1m by 1m indoor up to 100 square meter building integrated or free standing billboards.

These screens can be controlled from anywhere around the world by connecting them to your office network or installing a sim card and downloading an application on your mobile device.
